Index

Volume 17, 1985

Helmholtz reciprocity: its validity and application to reflectometry	F. J. J. Clarke and D. J. Parry	1
In search of an improved method for assessing the colour rendering properties of light sources	Thorstein Seim	12
Chairman's Address—Widening Horizons	Margaret Halstead	23
A combined colour preference-colour rendering index	J. Schanda	31
Movement under emergency lighting: the effect of illuminance	P. Boyce	51
Representation of skylight availability in Australia in different climatic zones using regression procedures	Nancy C. Ruck	72
Spectral properties of metal halide lamps with rare earth-iodide or Sc-iodide and sodium iodide	P. Tielemans, P. Drop and R. Lorenz	79
NIC Report		89
Some approaches to the treatment of obstruction in interior lighting design	I. McEwan and D. J. Carter	107
Subjective appraisals of road lighting	P. Gordon	116
Pitfalls in appraisal studies of road lighting	P. Padmos	120
The effect of walls on colour rendering	J. J. Embrechts	122
The lighting of curves on arterial roads	A. J. Fisher and R. R. Hall	129
The roving eye: dynamic perspective	J. M. Waldram	153
The luminous efficacy of daylight: a review	P. Littlefair	162
Luminance distribution characteristics of homogeneous skies: a measurement and prediction strategy	R. Kittler	183
A simpler equation for the rms volt-ampere characteristics of fluorescent lamps	L. Di Fraia	189

Research Notes and Technical Notes

A flexible system for visual performance studies	M. J. Perry	35
A case study for the design of visual environment of a control room in a power plant	Gong-Xia Yang, Gen-Xing Chi and Jue-Zhong Jiang	84
Luminance ratios at visual display workstations and visual performance	S. Kokoschka and P. Haubner	138
The visual cut-off angle of vehicle windscreens	D. A Schreuder	192

Correspondence 99, 195

Book Reviews 100, 145, 194

Abstracts 41, 101, 146, 197

New Publications 49, 106, 151, 200

Errata 194
